Team 1 = Safety Management

Team 2 = Chemical and Industrial Process Safety

Team 3 = Industrial Systems Malfunction

Team 4 = Human Risk Management

1ST NATIONAL CONFERENCE ON SAFETY ENGINEERING AND ENVIRONMENTAL SUSTAINABILITE

1. Context

In today's rapidly evolving industrial landscape, companies face increasing challenges in ensuring process safety, occupational health and safety (OHS), and environmental sustainability.

The increase of complexity in industrial operations and the enforcement of stricter regulations has pushed companies to adopt proactive and innovative strategies to minimize risks, ensure employees protection, and reduce their environmental impact. In this regard, accidents related to hazardous materials, equipment failures, and human factors continue to pose significant threats to operational continuity.

Additionally, workplace well-being has become a central concern, as industries endeavor to create safe work environments. At the same time, the urgent need for sustainable industrial practices calls for the adoption of cleaner technologies, resource-efficient processes, and waste reduction strategies to meet global environmental goals.
